Kyushu University

Graduate Programs 2021

History

Sep. 2018
Ito Campus relocation completed

May 2011
First centennial anniversary celebrated

Apr. 2004
Launched as a National University Corporation

Oct. 2003
Kyushu Institute of Design integrated

May 1949
Kyushu University established under National School Establishment Law

Jan. 1911
Kyushu Imperial University established

Apr. 1903
Fukuoka Medical College established

Fast Facts

18,619
undergraduate and graduate students
(As of May 1, 2019)

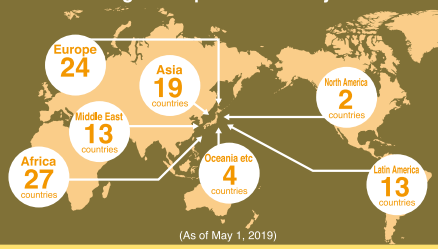
2,074
faculty, including 271 non-Japanese
(As of May 1, 2019)

9 : 1
student-to-faculty ratio
Providing education and research individually tailored to each student

One out of every eight students is from overseas.

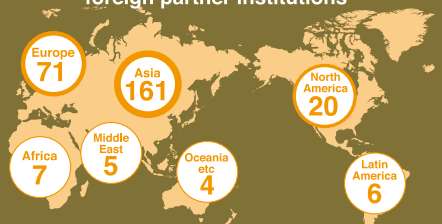
(As of May 1, 2019)

102
countries and regions represented at Kyushu University!



(As of May 1, 2019)

274
foreign partner institutions

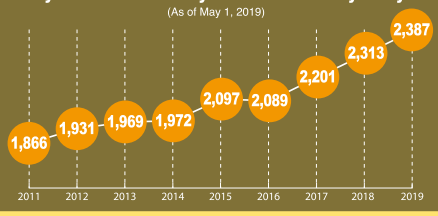


At these institutions, undergraduate and graduate students can study abroad up to one year without paying tuition to the host institution while maintaining enrollment at Kyushu University.

(As of May 1, 2019)

The number of international students coming to Kyushu University is on the rise yearly.

(As of May 1, 2019)



University Budget

¥125.85 billion

Ito Campus

2,717,130 m²
The largest campus in Japan

Research

Funded research
¥10.1 billion
889 projects
Funded research is conducted on behalf of corporate or other partners who choose us for our diversity of research and facilities.

Joint collaborative research
¥2.6 billion
838 projects
Joint collaborative research is conducted by teams consisting of our researchers and those from corporate or other partners.

Admission Procedure

Admission procedures differ depending on department and course. Applicants should study the admission guidelines of the course or department of their choice carefully. Below follows a general overview of the admission procedure.

(1) Find a professor who specializes in the field you are interested in. Contact this professor by e-mail and ask for permission to your participation in his/her laboratory.

Information on professors/researchers affiliated with Kyushu University is available at:
http://hyoka.ofc.kyushu-u.ac.jp/search/index_e.html

*Applicants as Research Students for School of Law should contact the Administrative Office of Law at first.
Please check information in page 7.

(2) Prepare the application forms and other required documents.

(3) Submit the necessary application documents in accordance with the application guidelines before the deadline.

Scholarships

(1) MEXT Scholarships

The Ministry of Education, Culture, Sports, Science and Technology (MEXT) Scholarship program was established to increase the number of international students enrolled in Japanese universities.

For more information on all aspects of MEXT scholarships, please visit
http://www.isc.kyushu-u.ac.jp/intlweb/en/admission/government-exprese

Applicants from the China must undergo different procedures. For details, please visit:
https://www.csc.edu.cn/

(2) JASSO Honors Scholarships

The Japan Student Service Organization (JASSO) grants scholarships to privately financed international students after their entollment at Kyushu University.

For more information, please visit:
http://www.jasso.go.jp/en/study_j/scholarships/scholarship/shoureihi/index.html

(3) Foreign Government Scholarships

(4) Other Scholarships

Various scholarship opportunities are granted by private foundations, international associations, and local governments.

For more information about other scholarships, please visit:
http://www.isc.kyushu-u.ac.jp/intlweb/scholarship/view/list.php?nendo=2020&lang=en

Tuition and Other Fees

The tuition and fees for enrollment and application are shown below. MEXT scholars are eligible for a tuition and enrollment fee waiver.

Tuition	Enrollment Fee	Application Fee
¥535,800/year	¥282,000	¥30,000

¥ = Japanese Yen

Students' Voices

Jason Mark Alexander
(From the USA)

In IMAP and IDOC, we focus on fundamentals of history, art, religion, literature, and other disciplines, mainly involving premodern Japan. Our stellar professors advocate flexibility and personal growth, offering extensive, personalized guidance on research methodology and supporting further studies in Japanese. Several times each semester, the cohort explores Kyushu and surrounding areas on field trips to important sites and exhibitions relevant to each student's interests. This is a valuable opportunity to explore and do fieldwork, crossing disciplinary boundaries with the supportive feedback of peers and advisors. My time here has revealed new paths for continuing research and work in Japan.

Students' Voices

Doan Hong Ngoc
(From Vietnam)

I chose ISGS because of the world-class research opportunity and integrated coursework that it offers. My research is focused on gender discrimination and segregation at the workplace in Vietnam. It particularly looks into why female employees working in the pharmaceutical industry, who despite having qualifications and working experience, still struggle with promotion. Here, I can select a committee of at least three supervisors who provide support and guidance for my research. Moreover, the interdisciplinary approach to various study fields of the master program allows me to take diversified classes, which help me to acquire a deep understanding of contemporary issues.

Graduate School of Human-Environment Studies

DEGREE

Master of Arts / Engineering
Doctor of Philosophy / Engineering

CAREERS

Architects, urban Planners and researchers

Students' Voices

CHEN SITING
(From China)

To study at Kyushu University has been one of the best choices I ever made.
The interdisciplinary system of the Graduate School of Human-Environment Studies provided me many chances to broaden my horizons and helped me to understand the urban system from multi-perspective. There are many chances to collaborate with students from different cultures through workshops in Japan and abroad, which improved my international communication ability. Besides, I am grateful for the opportunity to exchange to Pusan National University (PNU) of Korea for half a year and graduated with a dual degree in both Kyushu University and PNU. Kyushu University also provides a warm and friendly environment with excellent student support services. For prospective students in the field of architecture and urban studies, the Sustainable Architecture and Urban Systems program at Kyushu University is a choice you will never regret!

DEPARTMENT	COURSES
Architecture	Masters in Sustainable Architecture and Urban Systems Doctoral course in Sustainable Architecture and Urban Systems
Urban Design, Planning and Disaster Management	

APPLICATION PERIOD	
Research Students	End of May, 2020(undecided), End of November, 2020(Undecided)

(From Russia)

The International Economic and Business Law program in Kyushu University is something that you could not imagine. It creates a perfectly suitable environment for your growth as a lawyer and a researcher as you meet with the most qualified professors not only from Japan, but from all over the world teaching and discussing recent and hot topics in diverse legal fields and try to find the solutions for them together. But the most precious thing is that thanks to the members of the faculty and your classmates it becomes your new home. Don't miss this chance!

EKEJIUBA CYNTHIA

Ucheoma (From Nigeria)

Japan prides herself as one of the safest and neatest places in the world, with cutter-edge technologies, and characterised with people committed to work and development. Kyushu university also shares these glories as it is one of the leading universities in Japan in terms of Research, and it is equipped with world class facilities for learning in various disciplines. It also runs various international programs taught in English, such as International Program in Public Economics (IPPE). Anyone considering studying overseas and needs a safe haven equipped with facilities for learning, and conducting research, then look no further, as Japan and Kyushu university is the right place to be.
You are graciously welcomed to come join us at Kyushu university, Graduate School of Economics. We look forward to your enrollment.

My lab's research area is spintronics. We are trying discover exotic characteristics of electron spin by making thin film deposition based on sputtering and also nano-structure fabrication based on electron beam lithography. We also use RF frequency measurement based on network analyzer. In our lab we can use many cutting-edge tools and technology and advanced high-tech machines for our research. My professor and lab mates are very helpful and I am learning a lot regularly with the help of their kind guidance. I am really happy to be a part of the graduate school of science of Kyushu University.

(From Sri Lanka)

I do my research in the area of Number Theory in Mathematics. Japan's advanced educational standard and rich cultural heritage motivated me to come to Japan. I am grateful to my supervisor Prof. M. Kaneko for giving me the opportunity to study at Kyushu University. Kyushu University has excellent professors and researchers with versatile expertise from academia. It provides all the services and facilities to ease student life. Being a part of an academically prestigious university like Kyushu University is a precious opportunity. I truly believe that this is the ideal university to accomplish one's academic objectives.

When I decided to study in Japan, I was anxious about my language inability. In Kyushu University, however, with a graduate course in English, international support-centers, cooperative office personnel, and free language course, I soon overcame that barrier. Since the university has relocated to Ito Campus, everything is new here — a new library, cafeterias, and facilities! Even with interdisciplinary research fields like mine, one can promptly access state-of-art resources. Also, you will be joining many national and international conferences. In Fukuoka, the foods are delicious; and lifestyle is convenient. I cannot recommend it enough if you want to study in Japan.

Students' Voices

Guo Jie
(From China)

Hello, everyone, here is Jie Guo, from Xinjiang, the largest province in China. Now, I am studying as a Ph.D. student at the Department of Advanced Medical Initiatives, under the supervision of associate professor Akahoshi Tomohiko. It is an enjoyable experience studying at Kyushu University. Luckily, upon the recommendation of Dr. Akahoshi and Kyushu University, I am financially supported by various scholarships until I graduate, which can help me concentrate on my research without any financial scruple. The research topic I am focusing on is about autoimmune hepatitis and nonalcoholic steatosis hepatitis. With the kindness concern and help of my professor and many friends, my life in Japan runs smoothly.

Students' Voices

Pery Pinheiro Freitas

(From Brazil)

The Graduate School of Dental Science and, particularly, the Doctoral program in Biomaterials have proven to be above my expectations. Interdisciplinary teaching is a rule of thumb in this graduate school. In my laboratory, I have found a highly international, friendly, and exciting environment. I am continually learning new concepts, techniques, approaches, and so on, in an atmosphere where I am both challenged to seek the answers independently and surrounded by world-class professors who are there to help me develop my skills. On top of all that, benefitting from Kyushu University's prestige is a big plus for my career.

Students' Voices

CHIN-LING HSIEH
(From Taiwan)

Here, you may learn the knowledge of pharmaceutical sciences, including clinical pharmacy and medicinal sciences like biochemistry, pharmacology, analytical chemistry, pharmacokinetics and pharmaceutics. In addition, not only the education but also you may experience incredible culture, traditions, and social atmospheres. Furthermore, in Kyushu University, there are many foreign students from different background. You can expand your friendships with talented people and upgrade your language proficiency in both English and Japanese. I really love the life here, and I hope more people can experience such an amazing life in Kyushu University as well.

The atmosphere in Kyushu University is open and international which provides a healthy workspace environment. My 1st-year here has been enriching, both professionally and personally. I have had numerous opportunities for learning and skill development. Facility sharing between laboratories is so seamless which builds the platform for collaborative research. A wide range of contemporary global courses are offered which diversifies learning. Professors are genuinely happy to help and offer lots of one-to-one interactions. Here you'll get plenty of opportunities for networking with industry and academic leaders. Living in one of the most livable cities will truly make your stay fulfilling.

Students' Voices

Natalia Postnova

(From Russia)

Kyushu University has some unique study programs and great specialists to learn from in English and in Japanese. A lot of exchange programs let me work not only with Japanese students, but also with students from many different countries. This widens my professional and friends' circle, making it worldwide. Fukuoka is an amazing place to experience Japanese culture, and it is also one of the most livable cities on the planet. High quality of food, easy transportation, reasonable prices and support from the local communities let students concentrate on the study, without constant worries and stress of the big city.

CHANSU HAN
(From Korea)

The unique experience at Kyushu University made me special. The Ito Campus is large and new, and it is very suitable for studying and research. I am delighted to have a high level of education by discussing closely with faculty members who are active in the world. Also, my professor has a lot of joint research projects with external institutions, and I am pleased that I have been trained at the institution and hired. Moreover, another reason why Kyushu University is wonderful is that it has a high-quality international student support system. I respect the lab members and faculty, and I am proud to be a student at Kyushu University.

DEPARTMENT	COURSES
Applied Science for Electronics and Materials	Electric Process Engineering Optical Functional Material Engineering Quantum Physicality Molecular Process Engineering Molecular Material Science Functional Physical Evaluation Global Innovation Center
Molecular and Material Sciences	Solid Surface Science Functional and Structural Materials Science Molecular Dynamics and Spectroscopy Strength of Materials Design of Functional Organic Molecules Organic and Organometallic Synthesis Hybrid Material Science Development of Advanced Materials Global Innovation Center Center of Advanced Instrumental Analysis Faculty of Arts and Science
Advanced Energy Engineering Science	High Density Energy Science Engineering Science for Advanced Energy System Fusion Plasma Engineering Science High Energy Material Science Advanced Energy System Technology
Energy and Environmental Engineering	Fluid and Thermo Dynamics Thermal Environment Engineering Thermal and Fluids Engineering
Earth System Science and Technology	Fluid Environmental Research Fundamental and Geophysical Fluid Dynamics Environmental Metrology Environment Prediction

Note: The reorganization of "the Interdisciplinary Graduate School of Engineering Sciences (IGSES)" is currently under consideration. The Further details will be announced on our website as soon as it is approved.

Students' Voices

Alisa Bannaron

(From Thailand)

Studying in Kyushu University is one of my life-changing milestones. With not only well-equipped laboratories with innovative and advanced technology, enthusiastic providing in academic and leisure events for international students are wonderful in here. Staffs are incredibly friendly and supportive to help us with any issues. Japanese classes are also available for foreign students with various levels, which are very useful. Most importantly, Fukuoka is a well-established city offering perfect harmony in history, nature, and cosmopolitan. People are also kind here that they are willing to help you whether they know you or not. Living here is graceful.

Graduate School of
Bioresource and Bioenvironmental Sciences

DEGREE

Master of Science
Doctor of philosophy in Agricultural Science

CAREERS

Agriculture, forestry, fisheries and manufacturing

DEPARTMENT	COURSES
Bioresource Sciences	Agricultural Bioresource Sciences Animal and Marine Biosciences
Agro-environmental Sciences	Bioproduction Environmental Sciences Forest Environmental Sciences Sustainable Bioresources Science
Agricultural and Resource Economics	Agricultural and Resource Economics
Bioscience and Biotechnology	Molecular Biosciences Systems Bioengineering Food Science and Biotechnology

APPLICATION PERIOD

Research Students
(Spring Term Entry) Mid December 2020,
(Autumn Term Entry) Mid June 2021

Doctoral Program
1st: Mid January 2021,
2nd:Late March 2021,
3rd:Early June 2021

Master's Program
(Spring Term Entry) Late December 2020,
(Autumn Term Entry) 1st:Mid January 2021,
2nd:Late March 2020, 3rd:Early June 2021

Students' Voices

Helen Valerie Corales
(From Philippines)

I am currently a student in the Graduate School of Bioresource and Bioenvironmental Sciences' PhD program, concentrating on topics in agriculture and resource economics. I began my studies at the Environmental Economics Laboratory in 2017 in the MS program and moved into the PhD program this fall. Kyushu University has proven to be an excellent choice to follow my interests in environmental conservation and policy. Its graduate program pursues a rigorous mindset, providing incredible opportunity for scientific growth and exploration among its students. In addition, the faculty and students share a supportive and engaging research environment that promote serious scholarship and collaboration. The Japanese Government (Monbukagakusho: MEXT) Scholarship through the recommendation of my supervisor, Prof. Mitsuyasu Yabe, has been instrumental in providing financial support that enabled me to pursue both graduate degrees at Kyushu University.

Graduate School of
Integrated Frontier Sciences

DEGREE

Master of Engineering / Automotive Science / Philosophy in Automotive Science
Doctor of Engineering / Automotive Science / Philosophy in Automotive Science

CAREERS

Researchers and engineers in various fields

Students' Voices

SYUAIBATUL ISLAMIYAH
(From Indonesia)

It's such a great honor for me to be able to join International Master Program of Department Automotive Science, Kyushu University since 2018. My experience on studying here so far has been challenging yet exciting. I came with chemistry background and the diversity of courses offered here as well as hands-on experience in the lab not only help me to deepen my understanding on my field but also broaden my perspective on how it is going to be applied especially on automotive field to achieve carbon neutral society. Fukuoka with its laid back and charming atmosphere is also a great place to study! So if you have been dreaming to study in Japan, why don't give Kyushu University a try!

DEPARTMENT

Automotive Science

COURSES

Advanced Material and Chemistry Field
Dynamics Field
Information and Control Field
Human Science Field
Social Science Field

APPLICATION PERIOD

Research Students	April Admission: Mid January,2021 October Admission: Mid July,2021
Master's Program	April Admission: October Admission: For derailed information, please refer to the following website. http://www.ifs.kyushu-u.ac.jp/pages/eng/ams/admission/
Doctoral Program
